Operation Zugzwang — REDFOR Order of Battle

CNDF forces, RFF pool, and visible BLUEFOR forces

Counter states: Ready · Degraded (−1 when used) · Destroyed (removed).

Visible counters start on the central map, and BLUEFOR can see them. **Hidden** counters stay on this sheet until you use them or BLUEFOR finds them.

Core function (AFDP 3-0): AS = Air Superiority, GPA = Global Precision Attack, RGM = Rapid Global Mobility, GISR = Global ISR, C2 = Command and Control. **Joint** = Army, Navy, or Marine Corps.

You have **more assets than BLUEFOR**. Your problems are distance, a single forward base, and politics (Team Packet §3).

1. In theater at start: 15 counters

All on **Camas (Z6)** unless noted. All **visible**.

ID	Asset · core function	What it does	Limitations (BLUEFOR will use these)
R-01	**F-35A Lightning II** squadron (~12) · AS, GPA	Stealth multirole. Penetrates air defenses, precision strike, sensor fusion (shares its picture with others).	Limited internal weapons load. Needs tankers at 250 mi. High maintenance demand.
R-02	**F-22A Raptor** squadron (~12) · AS	The premier air-superiority fighter. Stealthy, fast, sweeps enemy fighters.	Small air-to-ground load. Low numbers mean each loss hurts.
R-03	**F-15E Strike Eagle** squadron (~12) · GPA, AS	Heavy payload, long-range strike, air-to-air capable	Not stealthy, so vulnerable to intact Patriot and short-range SAMs
R-04	**A-10C Thunderbolt II** squadron (~12) · GPA	Close air support, and very effective against small boats and patrol craft	Slow and low. Very vulnerable to SAMs and fighters until the air threat is suppressed.
R-05	**KC-46A Pegasus** tanker detachment · RGM	Air refueling: extends the range and persistence of every other aircraft	Unarmed, a high-value target. Losing it grounds the strike plan.
R-06	**E-3G Sentry (AWACS)** · C2, GISR	Airborne radar picture and battle management	A high-value target. Must stay back from SAM and fighter threats.
R-07	**RC-135V/W Rivet Joint** · GISR	Signals intelligence: locates radars and communications	Must stand off. High-value target.
R-08	**RQ-4B Global Hawk** · GISR	High-altitude, long-endurance wide-area imagery	Unarmed. Can be shot down by Patriot. Weather limits its imagery.

R-09	**MQ-9A Reaper** detachment · GISR, GPA	Long-endurance ISR, light strike	Slow. Easily shot down by SAMs or fighters.
R-10	**EC-37B Compass Call** · electromagnetic spectrum	Electronic attack: jams communications and radar networks	Effect is temporary and local. Must stay within range.
R-11	**C-130J Super Hercules** detachment · RGM	Intra-theater airlift, short and rough airfields (an ACE enabler)	Vulnerable near defended areas
R-12	**HH-60W Jolly Green II + HC-130J** rescue package · personnel recovery	Combat search and rescue of downed aircrew	Vulnerable. Needs escort and air superiority.
R-13	**Patriot** air and missile defense battery · Joint (Army)	Defends Camas against aircraft, cruise missiles, and ballistic missiles	Limited interceptors. A salvo can exhaust it. One battery covers one area.
R-14	**P-8A Poseidon** maritime patrol · Joint (Navy)	Maritime surveillance, tracks boats and minelayers, anti-ship strike	Vulnerable to SAMs near the Omak coast
R-15	**Destroyer surface action group**: 2–3 Arleigh Burke-class ships · Joint (Navy) · **in Z9 East Approach**	Air defense at sea, escorting shipping, Tomahawk land attack	Vulnerable in the Narrows to mines, patrol boats, and coastal anti-ship missiles

2. At home in Cosmopolis (off-map box Z1): 7 counters

ID	Asset · core function	What it does	Limitations
R-16	**B-52H Stratofortress** with JASSM-ER (land attack) and LRASM (anti-ship) · GPA	Flies from home with tanker support. Launches standoff missiles from outside SAM range.	A home-based strike sortie takes the **whole turn**. Not stealthy.
R-17	**B-1B Lancer** with JASSM-ER and LRASM · GPA	Fast heavy bomber with a large standoff-missile load. Good against shipping.	Whole-turn sortie from home. Not stealthy.
R-18	**B-2A Spirit** · GPA	Stealth penetrating bomber, global reach from home	Very few airframes. Each loss is a strategic and political shock.
R-19	**C-17A Globemaster III** airlift · RGM	Strategic airlift: moves forces and supplies from home	Needs secure airfields at both ends
R-20	**Space Force support**: GPS, SATCOM, missile warning (SBIRS)	Precision navigation, long-haul communications, early warning of missile launches (cues R-13)	GPS and SATCOM can be jammed. Asotin has counterspace capability.
R-21	**Cyber mission teams**	Network intrusion and disruption of C2, air defense networks, and propaganda outlets	Effects are uncertain and slow to build (a big project). Escalation and attribution risk.
R-22	**AFSOC MC-130J + Special Tactics team**	Covert insertion, terminal attack control, airfield seizure or survey, personnel recovery	Small. Operations inside Omak take −1 (S-B5). Capture is a political disaster.

Your hidden assets. BLUEFOR doesn't know about R-18, R-21, or R-22. A hidden asset goes on the map once you use it, so think about *when* to reveal each one. A secret COA (Rules Handbook §2.7) is one way to use them as a trap.

3. RFF pool

Request these with an RFF slip. Arrival is counted from the turn the request is approved (Scenario Brief §7). Arriving forces do nothing on the turn they arrive.

ID	Asset	Arrives	Approval
R-30	Additional **F-35A** squadron	N+1	Needs basing room. Camas is crowded without ACE.
R-31	Additional **KC-46A** detachment	N+1	Routine
R-32	**ACE package**: RED HORSE engineers and base kits for dispersed airfields	N+1	Needs a host location (Latah, or Camas secondary fields)
R-33	**Sustainment package**: munitions and fuel resupply (lifts S-R1)	N+1	Routine
R-34	**Mine countermeasures group** · Joint (Navy)	N+2	Routine
R-35	Additional **Patriot** or **THAAD** battery · Joint (Army)	N+2	Routine
R-36	**Carrier strike group** with F/A-18E/F and F-35C · Joint (Navy)	N+2	Political: needs Domestic Will ≥ 3
R-37	**Airborne infantry brigade** · Joint (Army)	N+2	**Political: ground forces need national approval.** Domestic Will ≥ 4, or a prior successful COA making the case.
R-38	**Amphibious ready group / Marine expeditionary unit** · Joint	N+3	Same as R-37
R-39	**Authorities**: e.g. permission to strike leadership targets, or to engage Asotin shipments	N+0 (decision)	Political. The white cell weighs Domestic Will and International Opinion.

You can also make free-text RFFs for something not on this list. The white cell decides.

4. Enemy forces you can see

These are BLUEFOR's **visible** counters, already on the central map. Their limitations are your Cons. BLUEFOR may also have hidden assets that aren't listed here. Your Intelligence Products may hint at them.

ID	Asset · owner · zone	What it does	Limitations
B-01	**F-16C/D Fighting Falcon** squadron 1 (~12) · NDF · Z11 Omak City (Capital)	Multirole air defense and strike	Outclassed by the F-22 and F-35, and by AWACS-supported forces. One main base makes it vulnerable.
B-02	**F-16C/D Fighting Falcon** squadron 2 (~12) · NDF · Z11	Same as B-01	Same
B-03	**F-15C Eagle** squadron (~12, older) · NDF · Z12 Interior	Air-superiority interceptor	Aging airframes. Spare parts came from Cosmopolis and are now cut off.
B-04	**Patriot battalion PAT-1** (PAC-2) · NDF · Z10 Coast	Denies the air over the Strait to non-stealthy aircraft. Can engage missiles.	Mobile but slow to relocate. Its radar emits when active, which the RC-135 can find.
B-05	**Patriot battalion PAT-2** (PAC-2) · NDF · Z11 Omak City (Capital)	Protects Omak City and the main air base	Same as B-04
B-07	**AN/FPS-117 early-warning radar** network · NDF · Z10–Z12	Long-range detection and cueing for Patriot and fighters	Fixed sites. Can be jammed (EC-37B) and struck.
B-08	**Harpoon Coastal Defense** battery CB-1 (~75 mi) · NDF · Z10 (west Narrows)	Holds shipping and warships in the Strait at risk	Needs targeting data from radar, drones, or the militia
B-12	**Mark VI patrol boat** flotilla (~8) · NDF · Z10 / Z8	Strait patrol, escort, interception	Very vulnerable to A-10s, P-8s, and helicopters once found

B-13	1st Armored Brigade: **M1A1 Abrams, M2 Bradley** (Army) · NDF · Z11	Defends Omak City (the capital)	Vulnerable to air attack in the open
B-14	2nd Armored Brigade: **M1A1, M2** (Army) · NDF · Z10	Defends the coast and Fortune Harbor	Same
B-15	Coastal Defense Brigade: **M777** howitzers, **Javelin** teams (Army) · NDF · Z10	Anti-landing defense	Static
B-16	Drone squadron: **MQ-9A Reaper** (~6) + **Switchblade 600** loitering munitions · NDF + PFA · Z12	ISR for targeting. Cheap precision strikes.	Easily shot down by fighters and Patriot
B-17	**C-130H Hercules** airlift detachment · NDF · Z11	Moves troops and supplies inside Omak. Receives airlifted Asotin supplies.	Vulnerable once REDFOR has air superiority
B-18	**PFA maritime militia** (~40 armed civilian boats) · PFA · Z10 / Z8	Harassment, swarming, scouting. Blends in with civilian traffic.	Light weapons. Low training. Political cost if civilians are hit.
B-19	**PFA militia brigades** (×3, ~15,000 fighters, with M4s, Javelins, and Stingers) · PFA · Z10–Z12	Urban and rural defense. Makes ground incursions very costly. Internal security.	Poor discipline. Abuses create backlash.

B-20	**PFA Information Directorate** (state media and social media) · PFA · Z11	Propaganda. Exploits the meddling scandal.	Credibility drops if caught lying
