# Operation Zugzwang — REDFOR Team Packet

Cosmopolis: objectives, intelligence estimate, constraints, planning guide

*Fictional training scenario. All military systems are real U.S. systems, described with unclassified, approximate capabilities.*

**Your REDFOR read-ahead** is four documents: the **Commander's Read-Ahead** (your orders), this **Team Packet**, the **REDFOR Order of Battle** (your forces, your RFF pool, and the enemy forces you can see), and the **REDFOR Intelligence Products**. You also have the common documents: the Player Rules Handbook, the Scenario Brief, and the Player Forms.

## 1. Secret objectives

Keep these from BLUEFOR. The white cell scores them after Turn 7.

| # | Objective | Achieved | Partial | Not achieved |
|---|---|---|---|---|
| **R1** | **"Open the Strait!"** | Strait Traffic = **Open** at game end | Restricted | Closed |
| **R2** | **"Restore a friendly government in Omak!"** | The PFA/Indigo government has fallen (Regime Stability 0), **or** it has agreed in negotiation to new elections or the Sapphire president's return | Regime Stability ≤ 1, **or** formal talks on Omak's government have begun | Regime Stability ≥ 2 and no talks |
| **R3** | **"Cut Asotin out!"** *(long-term)* | No Asotin military personnel or Asotin-crewed units in Omak, **and** at least one Asotin shipment interdicted or | No Asotin military personnel or Asotin-crewed units in Omak | Asotin personnel or crewed units in Omak, or an Asotin–Omak defense |

| | | | | |
|---|---|---|---|---|
| | | turned back by diplomacy | | agreement signed |

**Things to think about**

- No single COA will settle an objective. Plan a sequence.
- R1 and R2 both run through the tracks (Strait Traffic and Regime Stability). Decide which tracks you will push each turn.
- R3 requires stopping something Asotin hasn't done yet. Watch for it, and think about what authority you would need to act (R-39).
- A negotiated outcome can count. Talks are a weapon too.

# 2. Intelligence estimate

*This is the Joint Staff's assessment of what Cosmopolis believes. It may be incomplete or wrong. The Intelligence Products are the raw reporting behind it, and they don't all agree. Use RFIs and ISR COAs to confirm. All visible BLUEFOR counters are on the central map.*

- **Air defenses:** two Patriot battalions, PAT-1 (coast, covering the Narrows) and PAT-2 (Omak City, the capital), locations known. Short-range air defense systems are likely, but their number and locations are unknown.
- **Coastal anti-ship missiles:** at least one Harpoon coastal-defense battery (CB-1) near the western Narrows.
- **Long-range strike:** we never sold Omak PrSM missiles. Reports of HIMARS units in Omak are unconfirmed.
- **Mines:** Omak may have some aircraft-delivered mines.
- **Latah:** supports us. Basing talks are ongoing.
- **Asotin:** is arming Omak, extent unknown. Asotin is expected to avoid fighting us directly.
- **Sapphire loyalists:** there is significant loyalist sentiment in the NDF officer corps.

**Good first RFIs** might target the gaps above: where the short-range air defenses are, whether there are more anti-ship batteries, what Asotin has shipped, and how Latah's leaders are leaning.

# 3. Your constraints at a glance

**Your starting conditions** (full text in Scenario Brief §6)

| ID | Name | What it means for you |
|---|---|---|
| S-R1 | The 8,000-Mile Tail | Camas sustains high tempo for **3 turns**, then −1 on Camas-based strikes until resupplied (R-33, or a resupply COA) |
| S-R2 | Single Hub | One good BLUEFOR strike on Camas can Degrade **every** counter there. Fix: ACE dispersal (2 successful COAs). |
| S-R3 | Latah Hesitates | No combat sorties from Latah until a diplomatic COA succeeds or Opinion reaches +3 |
| S-R4 | Legitimacy Deficit | −1 to COAs relying on third parties while Opinion ≤ −1. Fix: raise Opinion to 0. |

**BLUEFOR advantages you are up against**

| ID | Name | What it means for you |
|---|---|---|
| S-B1 | A House Divided | BLUEFOR takes −1 when NDF and PFA must work together. Exploit the seam. |
| S-B2 | Sapphire Loyalists | You may argue for defections or sabotage, at −1 because of S-B5 |
| S-B3 | Home Ground | BLUEFOR gets +1 defending, dispersing, hiding, and repairing in Z10–Z12 |
| S-B4 | Asotin's Backing | Asotin arms and intel reach Omak routinely. Interdicting them needs a COA and risks escalation. |
| S-B5 | Supportive Population | −1 to your COAs that rely on Omak civilians, until Regime Stability falls to 2 or lower |

**Your rules of engagement** (Scenario Brief §8): no WMD · no strikes on leadership or government targets in Omak City (Omak's capital) without authority · no ground forces on Omak soil without approval · respect Tekoan sovereignty · don't engage Asotin forces or

flagged shipments without authority · minimize civilian harm (a bad result costs Opinion −1 **and** Domestic Will −1).

**Tracks that matter most to you**

| Track | Starts | Watch for |
|---|---|---|
| Cosmopolis Domestic Will | 3 | **≥ 4** makes big RFFs easier. **0** forces a ceasefire. A Closed Strait costs −1 every turn. |
| International Opinion | −1 | **+3** gets you Latah combat basing. **−3** makes Asotin escalate. |
| Strait Traffic | Restricted | R1 needs **Open** at the end |
| Omak Regime Stability | 4 | R2 needs it at **0** (or ≤ 1 for partial). S-B5 weakens at **≤ 2**. |

# 4. Phase I & Phase III Planning

**Things to think about**

1. Which objective do we push first, and which tracks does that move?
2. How do we use the 3 turns of high tempo before S-R1 bites, and when do we request sustainment?
3. How do we protect the Camas hub, or get off it?
4. Which intelligence products do we believe, which do we doubt, and which do we need to confirm before we act on them?
5. What are our **non-kinetic** COAs? Some ideas to test: a diplomatic push for Latah basing (S-R3), an information campaign to repair our legitimacy (S-R4), outreach to Tekoa for overflight or radar sites, pressure on Asotin's supply line by diplomacy rather than force, or an offer of talks that puts Omak's government on the table (R2).
6. What would we need national authority for (R-39), and when do we ask?
7. Which hidden asset do we reveal first, and why?
